Discover your perfect family home or retirement haven! This family home features a spacious, bright open-concept design. The functional kitchen, complete with an island and walk-in pantry, is great place to make family memories. Enjoy the convenience of main floor laundry/mudroom. The dining area has a walkout deck for morning coffee that overlooks a dedicated garden and vegetable growing area. The finished lower level includes a huge bedroom and 5pc bathroom, providing extra space and comfort, along with a family room. The lower level could be a perfect inlaw suite. The carport allows you to drive right up to the door to unload groceries with ease out of the elements. Located centrally with proximity to all essential amenities. The back yard is lovely and includes a fire pit and shed for tools. The property backs on to bush for that cottage country feel. Don't miss this exceptional opportunity!

Point of Delivery: 10477409 Residential - Low Density Electricity..... This is the cost of generating the electricity you used this period. Usage is measured in kilowatt-hours (kWh) and depends on the wattage of devices you use and how long you use them. The Ontario Energy Board (OEB) sets the cost per kWh and the money collected goes directly to the electricity generators.

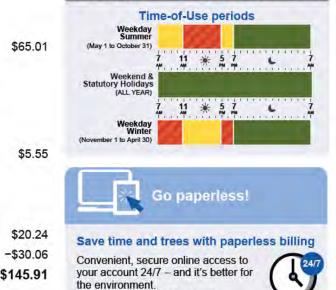

Delivery This is the cost of ensuring you have reliable power when you need it. Hydro One collects this money to build, maintain and operate the electricity infrastructure, which includes power lines, steel towers and wood poles covering 960,000 sq. km. A portion of this cost is fixed and a portion varies depending on the amount of electricity used.

Regulatory Charges..... The Independent Electricity System Operator (IESO) uses this money to manage electricity supply and demand in the province, which is necessary to ensure that there is enough electricity to meet Ontario's needs at all times.

charges and passes them to the IESO. These charges are used to cover the cost of electricity generation.

Energy Saving Tip

Phantom Power

Electronics use energy even when off. Plug them into power bars with timers or auto-shutoff to lower energy use.
